

**BC LOG & TIMBER**  
BUILDING INDUSTRY ASSOCIATION

*SUPPORTING OUR UNIQUE BUILDERS*

## Join us for Session 5 of our Virtual Workshop Seminar Series!

### Wood Finishing and the Maintenance Cycle

Presenters:

Dai Ona – Daizen Joinery

Sponsored by:

This is the third of a 6 to 8-month **Virtual Workshop Seminar Series Event** with monthly workshops and seminars on educational and informative topics relevant to our industry!

We are excited to offer this excellent opportunity to network with other industry members, suppliers, and associates and help you:

- Stay Informed
- Share Information
- Get Educated
- Shape Policy
- Earn CPD Points

**July 22, 2021 Seminar is Free!**

Sponsorship and presenter opportunities are available for all subsequent seminars!

#### Workshop Seminar Series Dates

- 1 March 25, 2021 – COMPLETE
- 2 April 22, 2021 – COMPLETE
- 3 May 20, 2021 – COMPLETE
- 4 June 24, 2021 – COMPLETE
- 5 July 22, 2021 – 1:00 – 2:30PM PST
- 6 August 26, 2021
- 7 September 23, 2021

\*Dates may be subject to change with advance notice

Register by completing the attached form and returning to

## Wood Finishing and the Proper Maintenance Cycle Presented by Dai Ona, Owner of Daizen Joinery

Dai Ona shares key factors, methods, and products in wood finishing based on his firsthand experience.

Wood finishing has two main functions: protection and aesthetic.

Protection is instrumental and works best with proper wood preparation and product application. Aesthetically, the look of the finish varies depending on the wood surface, its texture, and overall condition.

When done right, finishes can have excellent longevity, but ultimately are not permanent. Finishes done incorrectly or at the end of their lifespan will fail. Knowing why they have failed and what needs to be done when it does is of benefit to the homeowner so they can protect their investment. A proper maintenance cycle armed with the right techniques and the right products ensures this.

### About Our Sponsor

For more than 30 years, Sansin has been focused on creating the best performing, most beautiful water-borne wood finishes in the world for customers who demand the absolute best in performance and beauty for residential and commercial buildings.

Their innovative research and development programs have made them the leader in developing environmentally-friendly interior and exterior wood products and technologies that deliver outstanding color, durability and performance without the toxicity found in conventional stains.

Sansin launched with its Classic exterior product in the late 1980s, long before going green was mainstream, and it has since become their flagship finish for the log and timber industry. It is designed to be an eco-friendly, water-borne finish that penetrates deeply into larger and wetter pieces of wood, yet still allows the wood to breathe and release moisture slowly.

That principle of combining high-performance and beauty in a low-VOC, breathable wood finish has become their trademark for all of their products and why Sansin is a beloved wood finish in British Columbia, specified by architects, featured on high profile mass timber buildings, favored by log and timber professionals and carried by premium independent retailers.

Their long-standing mission and vision are tied to their love of wood and protecting it naturally. Their passion for wood is further demonstrated by their support of the industry in British Columbia. This is shown through their consistent support for associations, like BCLTBIA, engagement with the architectural community and pride in being "Made in Canada."

Sansin products are sold through a network of independent dealers in North America and Europe. Sansin retailers can be found at [www.sansin.com/dealer-locator](http://www.sansin.com/dealer-locator) and their architectural/factory finish Precision Coat line is at [www.sansinfactoryfinish.com](http://www.sansinfactoryfinish.com).
